IT'S MY WORLD

Everyday when I get home
I can see what I did wrong
And the back of my mind say
That I should know better
And I would give it all up
If I could turn back the clock
Would've treated you better
Now I see it clearer

I do believe there's a time to change
and I'm not, caught up in yesterday

Cause the world will keep on turning
And a light will keep on burning
For the fact that I'll be learning
Every minute of the journey
But if we don't stop pretending
There will be consequences
For the rivers that are flowing
When the fire's on the fire's on

It's my world
It's my world
It's my world

Somebody made it all up
The beauty of a raindrop
Just like a work of art
Mountains and rivers
I wanna see where it ends up
If I give it all my love
Every thought I give her will come back forever

I know, that we've got the right to change
And there's no reason to place the blame

Cause the world will keep on turning
And a light will keep on burning
For the fact that I'll be learning
Every minute of the journey
When the fire's on the fire's on
It's my world, it's my world...

I got a choice to make (for my world)
Before it fades away (my world)
It's now or never
Can't be like hey whatever
Whatever motivates (my world)
I gotta make a change
We're in this together

Cause the world will keep on turning
And a light will keep on burning
For the fact that I'll be learning
When the fire's on the fire's on

It's my world
It's my world
It's my world
